GRANDSTREAM PRODUCTS SUCCESSFULLY CERTIFIED BY TEKVIZION LABS TO BE SIP VERIFIED TO CISCO UNIFIED CALL MANAGER 5.0.

Brookline, MA - Grandstream Networks, a leading designer and manufacturer of next-generation IP Voice and Video products for broadband networks, today announced that tekVizion Labs, an independent 3rd party test lab has certified the BudgetTone 100 and GXP-2000 to be SIP verified to Cisco Unified Call Manager™ 5.0. tekVizion Labs is the first independent test lab of its kind to offer third party interoperability certification and verification of VoIP and IMS products and applications.

“Grandstream products have successfully passed tekVizion’s standard interoperability test with no outstanding issues and were issued a Statement of Certification for the BudgetTone 100 and GXP-2000 products,” said Chris Freeman, Director of Sales for tekVizion Labs. “This Certification applies to the current product versions, and products are only certified as interoperable in a configuration matching the testing environment, and for the features and functions tested as part of the test plan.”

“We are extremely pleased that the independent test team at tekVizion Labs successfully tested and certified the BudgetTone 100 and GXP-2000 to be SIP verified with Cisco Unified Call Manager™ 5.0,” said David Li, CEO of Grandstream Networks. “This confirms our belief that Grandstream’s technology is innovative and unique and that our products truly have interoperability with the leading SIP providers. We look forward to providing innovative and interoperable multi-media products for our customers in the near future.”

All of Grandstream’s products are available through Grandstream’s distribution channels worldwide. For more information about Grandstream products, please visit www.grandstream.com.

About tekVizion Labs

tekVizion Labs is the first independent test lab of its kind to offer third party interoperability certification and verification of VoIP and IMS products and applications. tekVizion PVS, Inc.
