

**FOR IMMEDIATE RELEASE**

**GRANDSTREAM ANNOUNCES THE AVAILABILITY OF THE GXV3005 IP VIDEO PHONE, FOR  
RESELLERS, IN TIME FOR THE HOLIDAYS**

The GXV3005 Provides Enhanced Capabilities and Flexibility to the Growing IP Videophone Market and Features an Additional FXO Port, Expanding the Versatility of the Grandstream IP Video Phone Family

Brookline, MA (December 12, 2008) - Grandstream Networks, a leading worldwide designer and manufacturer of innovative, affordable, and high quality IP voice and video products, today announced the GXV3005, a new addition to the popular GXV3000 IP video product line. The GXV3005 features the same design and all of the functionality as the GXV3000; however it comes with the advanced versatility of an FXO PSTN line port, which enables customers to receive both video telephony service over an IP network and their home land-line. VoIP resellers will benefit by distributing the enhanced capabilities and flexibility that the GXV3005 brings to the growing IP videophone market.

The GXV3005 is based on the same high performing feature set as the popular GXV3000, including a 5.6 inch TFT adjustable LCD screen, a VGA camera which allows nearly all viewing angles, support for real-time high-quality video (up to 30 frames per second) using H.264/H.263 video standard at bandwidths as low as 32kbps and up to 1Mbps. The additional FXO/PSTN port supports calling over and between two networks (IP and PSTN network) from a single phone and offers both a layer of security and back up for IP video phone communication by providing the option of a PSTN life line.

“We are excited to announce the availability of GXV3005, which further enhances the versatility and convenience of telephony-over-any-network on top of our popular GXV3000 IP video phone,” said David Li, CEO of Grandstream Networks. “The GXV3005 is the second model in the GXV3000 product family and we will continue to introduce more innovative enhancements to the GXV3000 series of advanced IP video phones in the near future.”

The GXV3005 is priced at \$325 and it will be available through Grandstream’s worldwide distribution channels beginning mid-December 2008.

**ABOUT GRANDSTREAM NETWORKS:**

Grandstream Networks is a leading designer and manufacturer of innovative, affordable, and high quality IP voice and video products for the worldwide broadband telephony market. Our products are fully compatible with the SIP industry standard, field proven with large and rapidly growing deployed base, and have broad interoperability with the majority of 3rd party SIP products on the market today.
