Grandstream Enhances IP Surveillance Solutions for SMBs

New Firmware Adds Broadened ONVIF Interoperability, WiFi Adapter Support and Door Opener Feature

Brookline, MA (September 28, 2010) – Grandstream Networks, the leading manufacturer of IP voice/video telephony and video surveillance solutions, today announced new firmware supporting broadened ONVIF interoperability with various 3rd party surveillance products and new feature enhancements such as support for WiFi (802.11n) adapter and remote door opener to strengthen its award-winning GXV series of IP video surveillance cameras.

A supporter of global network video standards for IP physical security, Grandstream GXV IP cameras are fully [ONVIF](#) certified and have achieved successful interoperability with many attending manufacturers' solutions during the recent 3rd ONVIF developer's Plugfest in Chicago during September 7-9. Broad interoperability underlines that investment in Grandstream's video surveillance products ensures resellers/integrators and enterprise customers who purchase Grandstream's solutions can focus on specific physical security applications rather than worrying about various products will work with another.

Also included in the firmware enhancement is the added support for external WiFi (802.11b/g/n) adapter for all of Grandstream's surveillance products that have a USB port, as well as a unique remote door opener feature that allows a user to remotely and securely control door opening via a Grandstream video camera that has one of the I/O ports connected to a door's electronic controller, by pressing a key on the Grandstream GXV3140 video phone while viewing/hearing real-time video and audio streaming from the door camera.

"Enterprise customers are increasingly drawn to IP based security solutions because they can integrate with an existing voice/data network, are more scalable, secure, and can be remotely monitored from anywhere in the world," said David Li, CEO of Grandstream Networks. "Grandstream is fully committed to the video surveillance marketplace and will continue to deliver innovative and standards based IP video surveillance products that meet customers' evolving demand."

Grandstream's GXV video surveillance product line supports VoIP/SIP standards that offer system integrators the unique advantage to converge video surveillance applications with voice communications. Businesses can reduce the cost and time associated with installing surveillance systems while achieving a greater level of functionality and flexibility for remote video monitoring/control and 2-way audio paging. With Grandstream products, businesses can stream monitoring activities to a mobile or video phone, from anywhere in the world, using Grandstream's 2-way audio and video streaming capability. High quality live video feeds from Grandstream's surveillance cameras can also be routed through Grandstream's GXE502x IP PBX and streamed onto Grandstream's IP video endpoints like the GXV3140.

ABOUT GRANDSTREAM NETWORKS

Founded in 2002, Grandstream Networks is the leading manufacturer of IP voice/video telephony and video surveillance solutions. Grandstream serves the small-to-medium business and consumer markets

with innovative products that lower communication costs, increase security protection, and enhance productivity. Our open standard SIP-based products offer broad interoperability in the industry, unrivaled features, flexibility, and price-performance competitiveness.
