**GRANDSTREAM SIP VOICE & VIDEO PRODUCT PORTFOLIO INTEROPERABLE WITH
SYLANTRO SYNERGY PLATFORM**

Grandstream Joins the Sylantro Global Summit as a Bronze Sponsor

IT EXPO, LOS ANGELES CONVENTION CENTER — Grandstream Networks, Inc. (www.grandstream.com), a leading designer and manufacturer of next generation IP Voice and Video products for broadband networks and Sylantro Systems (www.sylantro.com), the leading provider of multiplay application feature servers announced today the complete interoperability between the Sylantro Synergy platform and the Grandstream SIP Voice and Video portfolio including the GXP Multi-line SIP Enterprise Phone Series, the BudgeTone 200 and the Handytone Analog Telephone Adaptor Series.

The companies also announced that Grandstream is a Bronze sponsor of the Sylantro Global Summit, taking place Sept. 30 – Oct. 2 at the Mirage Hotel in Las Vegas. Grandstream will showcase their SIP Voice and Video portfolio at Sylantro's annual global gathering of service providers and ecosystem partners.

The Grandstream product portfolio is feature rich with superb audio and video quality, is easy to manage through web browser GUIs and offers automated secure provisioning. The Sylantro Synergy platform provides a broad array of carrier-grade hosted PBX and customer applications that enable service providers to deliver highly differentiated and high margin telephony services. Together, the Grandstream and Sylantro VoIP solution creates a complete and cost-effective IP Solution for both the service provider market and the business customer.

"Grandstream's SIP product portfolio offers the most compelling value in the industry in terms of features and price-performance benchmarks. The combination of Sylantro's Synergy platform and Grandstream SIP products creates an attractive opportunity for service providers and system integrators to deploy high quality and cost-competitive voice-over-IP and video-over-IP solutions to a broad market," commented David Li, CEO of Grandstream Networks. "We believe this combined solution offers exceptional value for large deployments."

"With Grandstream products, our service provider customer base has a very affordable, robust end to end VoIP solution to offer their customers." said John Trobough, senior vice president of Solutions for Sylantro. "Both the service provider market and the small-medium enterprise market are looking for high-performance and cost-effective VoIP solutions that are feature-rich, easy to manage and easy to deploy. Grandstream's feature-rich SIP phones and ATAs and our hosted PBX platform and customer applications create a new choice in the VoIP solutions market."

The GXP Series delivers superior performance and an advanced feature set. Whether you choose the entry-level 2-line phone, the IP key-system phone, or the advanced 6-line phone, the GXP Series offers dual 10/100 auto-sensing Ethernet ports with integrated PoE, independent SIP account for individual lines, advanced XML applications, multi-party conferencing, security protection, MLS (multi-language support) in 5 languages and automated provisioning for deployment over a large network. The GXP series offers a compelling package for both service providers and enterprise customers. The GXP Series retail at a starting list price of \$99.

The HandyTone Analog Telephone Adaptor series is a comprehensive portfolio of 1 or 2 FXS or FXO port combinations based on SIP standard. These ATAs are lightweight and compact and work with any phone or fax, support a broad range of codecs including T.38 fax, and offer integrated router, programmable FXO port,

or dual network ports options. The HandyTone ATA Series are ideal for residential users and retail at a starting list price of \$75.
