
GRANDSTREAM NETWORKS

Browser Plug-ins

Web Control Utility Version 1.0.0.7

Date: November 18, 2013

This new browser plug-in aggregates previous IE Active-X and Firefox Plugin from Grandstream with added Chrome support on latest firmware.

This new utility is a single program that supports all the three browsers (IE, Firefox and Chrome) and all models of surveillance products. This is Grandstream's effort to meet the customer's requirement of a unified program to access the camera's web UI.

SUMMARY OF UPDATES

CHANGES SINCE VERSION 1.0.0.4

BUG FIXES

- Fixed when switching preview between 1st and 2nd stream Chrome will crash. (Firefox and IE OK).
