GRANDSTREAM
CONNECTING THE WORLD

Our products are compliant with Metaswitch, the world's leading network software provider.

Long-standing relationship

Grandstream and Metaswitch have a long-standing relationship that has created thousands of successful deployments around the globe. The compatibility between Grandstream and Metswitch allows service providers around the world using a Metaswitch platform to easily deploy Grandstream products. Thanks to continuous compliance testing, Metaswitch partners can confidently take advantage of Grandstream's robust IP products without any restrictions.

Metaswitch Networks

Metaswitch designs, develops, delivers and supports commercial and open source software solutions for network operators. Metaswitch's high performance software runs on commercial, off-the-shelf hardware, as appliances or in the cloud. They package this software into solutions that are redefining consumer and business communications and enabling the interconnection between diverse network services and technologies. Metaswith's software development expertise is applied to remove network virtualization complexities in the data center, with a solution that easily scales and secures workload interconnection in support of mission-critical IT and real-time communication applications.
