

About Grandstream

Founded in 2002, Grandstream Networks Inc. has been connecting the world with award-winning innovative solutions. Grandstream is an ISO27001 certified major manufacturer of competitive Unified Voice/Video Communications, Data Networking, and Physical Security products for the small-to-medium businesses and service provider markets worldwide. Today, Grandstream has about 1,000 employees operating from 10+ countries and grows at double-digit compound annual growth rate in sales with millions of products shipped to our customers each year.

Unified Communication Solutions

IP desk phones, hotel phones, video phones, DECT/Wi-Fi wireless phones, analog telephone adapters, gateways, IP PBX, intercom devices, and cloud collaboration subscription services.

Data Networking Solutions

L3/L2+/L2 Lite/unmanaged network switches, Wi-Fi access points, wired & wireless routers, PtP/PtMP wireless transmission systems, and the cloud management system.

Physical Security Solutions

Smart access control devices, AI security cameras (coming soon), cloud storage and data analytics subscription services (coming soon).
