Grandstream Home

Home Networking Has Never Been Easier

The Grandstream Home app makes it easier than ever to setup, control, and monitor any home network. This free app was designed specifically for home users and pairs with Grandstream's GWN7062E and GWN7062ET Wi-Fi 6 Routers to enable quick home network setup and complete network control from the palm of your hand. Grandstream Home allows networks to be setup through a few easy steps while providing complete network control and peace-of-mind through remote management, client access control, parental controls, and real-time notifications. To ensure maximum network security and performance, this free app provides comprehensive device and network monitoring tools, mesh network management, and a built-in firewall. Designed to make home networking easier than ever, Grandstream Home pairs with the GWN7062E and GWN7062ET Routers to provide an easy-to-use home network solution.

Quick and Easy Setup: Scan a QR Code to configure your router and follow a few easy steps to setup your network

Remote Management: Monitor and control your home network from anywhere

Complete Network Control: Client access control, parental controls, Mesh networks, and real-time notifications provide control

Powerful Network Security: Device and network monitoring tools, intelligent detection, and a firewall ensure peace-of-mind

Mobile Platforms Supported	Android 10+, iOS 13+
App Name Shown on Device Screen	GS Home
Routers Models Supported	GWN7062E and GWN7062ET
